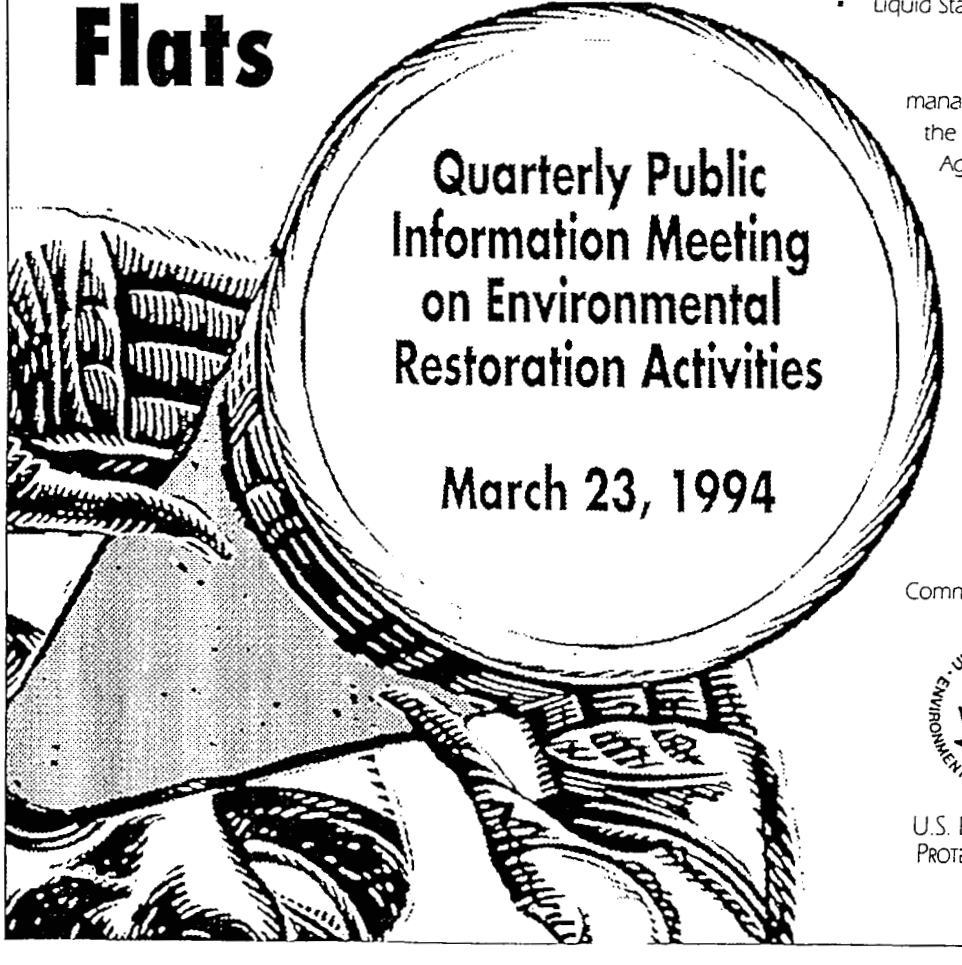
# Focus on Cleanup Activities at Rocky Flats



The U.S. Department of Energy, the U.S. Environmental Protection Agency and the Colorado Department of Health invite you to attend a Quarterly Public Information Meeting to learn about and discuss environmental restoration work at the Rocky Flats Site.

The main topics to be discussed will include:

- Operable Unit 2, 903 Pad, Mound and East Trenches
  A status of the Final Treatability Study Report for the Surface Water Interim Measure/Interim Remedial Action
- Operable Unit 4, Solar Evaporator Ponds
  This operable unit includes five ponds that were used in the past to store and evaporate contaminated water from the process buildings. An update will be given as to where this program is today and what has been accomplished
- Operable Unit 16, Low Priority Sites
  Response to Comments on the No Further Action Proposed Plan and an update for the next step
- Fiscal Year 1994 clean-up budget
  - Liquid Stabilization of Radioactive Solutions

General information about other environmental management projects will also be presented by representatives from the U.S. Department of Energy, the Environmental Protection Agency and the Colorado Department of Health.

**Please join us:**

**Quarterly Environmental Restoration Public Information Meeting**
**Wednesday, March 23, 1994**
