RE: RFLMA Contact Record 2008-01	
The Colorado Department of Publice Health and Environmental (CDPHE) has reviewed RFLMA Contact Record 2008-01, which reports the surface water and sediment sampling done in support of the requirements in the Rocky Flats Legacy Management (RFLMA). The Contact Record concludes that no further sampling is necessary to meet the RFLMA requirements. CDPHE has conferred with Region 8 on the Environmental Protection Agency and approves this contact Record.

Final Landfill Monitoring and Maintenance Plan RFETS Original Landfill Book 3 0f 4	
This Monitoring and Maintenance Plan (Plan) has been prepared for the Original Landfill (OLF) (Individual Hazardous Substance Site 115 and 196)(IHSS) at the Rocky Flats Environmental Technology Site (RFETS). Under the Final Interim Measure/Interim Remedial Action (IM/IRA) for the Original Landfill (U.S Department of emergy [DOE] 2005a), a 2-foot-thick soil cover was selected to address closure of the Original Landfill.

PD-A-000113	11/7/2008
Revision of Sampling locations to reflect Site Reconfiguration	
Two monitoring locations identified in the RFLMA warrant revision. 1. Sentinal well TH046992 is located in the Center of Dam B-3. This well will be abandoned as part of the upcoming dam breach project, following routine RFLMA-required sampling for the fourth calendar of 2008. It is proposed that well TH046992 be abandoned as required, but not replaced; and that RFLMA monitoring continue unchanged at nearby wells 95099 and 23296.

RE: Screening Level Evaluation for RF Solar Ponds Plume Treatment System Upgrades	
The Colorado Department of Public Health and Environment (CDPHE) has reviewed the above referenced Screening Level Evaluation. The evaluation was performed in response to concerns about treatment system additives proposed in RFLMA Contact Record 2009-01 and their potential effects on surface water quality. The information provided in the evaluation sufficiently addresses those concerns and the evaluation is approved as an addendum to Contact Record 2009 -01.

RE: RFLMA Contact Record 2010-01	
The Colorado Department of Public Health and Environment (CDPHE) has reviewed RFLMA Contact Record 2010-01, which proposed additional sampling at the Original Landfill in anticipation of eventual reductions in monitoring and maintenance schedules. Aspects of this sampling will be proposed for approval in a subsequent sampling and analysis plan. All the elements required by the Rocky Flats Legacy Management Agreement for a project of this type are adequately addressed and the contact record is therefore approved.

RE: Original Landfill Monitoring and Maintenance Plan modification request	
The Colorado Department of Public Health and Environment (CDPHE) has reviewed modifications made to the Original Landfill Monitoring and Maintenance Plan, dated September 2009.All the proposed changes are consistent with consultations between CDPHE and the Department of Energy and the current conditions at the Landfill.. Region 8 of the U.S. Environmental Proction Agency has also reviewed these modification and concurs with this conclusion. The modifitions are therefore approved

Delivery of 2009 Wetland Mitigation Monitoring Report for the Rocky Flats Site	
During cleanup and closure activities at the Rocky Flats Site (Site), several wetland areas were disturbed. The Site Wetland Mitigation Monitoring and Management Plan (WMMMP:June 2006) was written to address the mitigation and monitoring of these effects on the wetland. One of the requirements of the WMMMP is to produce an annual report the summarizes the monitoring data and management actions ans issues from the previous field season. Because of the large number of monitoring photographs that the report includes, it is in a completely electronic format. The report is set up on a website on the enclosed DVD. To access the report, put the DVD in a DVD drive, and open windows Explorer. Double-click on the file the report , called "START HERE 2009 Wetland Mitigation Report DVD.htm".

RE: RFLMA Contact Record 2010-02	
The Colorado Department of Health and Environment has reviewed the draft Contact Record 2010-02. This contact record allows excavations that would breach all the remaining dams in the Central Operable Unit. This action is acceptable for the same reasons that eailier breaching action were acceptable; i.e., their presence is not a requirement of the remedy and removal of the ponds provides several advantages that further the environmental restoration at the site. This propose action is in accordance with our regulatory requirements and guidance and this contact record is therefore approved.

RE: RFLMA Contact Record 2010-04	
The Colorado Department of Public Health and Environment has reviewed RFLMA Contact Record 2010-04, which proposes changes to the locations and evaluation protocols for the surface water POCs. Our review finds that the contact record accurately describes these RFLMA moldifications and the process to develop them. This contact record and concurs with its approval.

Draft CR 2010-06 SW027 - Rev 1 tech edits Rev 1 DRAFT RFLMA CR 2010-06 Monitoring Results at SW027	
I sent out a Draft CR last Friday before getting the tech editor's comment back. She picked up a few mostakes (e.g., you probsbly noted in paragraph at top of page 3, word "continuation" instead of "contamination"), so I've I fixed those and also adopted some of her suggested edits for clarity in this revised Draft. Based on the feedback on the Draft Contact Record 2010-04 for the proposed monitoring point changes, I also edited this Draft CR to replace references to "compliance values" with "12 month rolling average".

RE: RFLMA Contact Record 2010-02	
The Colorado Department of Public Health and Environment approved RFLMA Contact Record 2010-02 on April 15, 2010. In the interim the surrounding communities have raised concerns, including the potential violation of Institutional Control #2, as documented in the CAD/ROD and the Environmental Convenant. In addition, the schedule for implementing action that would require this approval is years in the future. In light of these considerations, our approval of Contact Record 2010-02-is withdrawn.

PD-A-000311	11/3/2010
RE: RFLMA Contact Record 2010-07	
The Colorado Department of Public Health and Environment has reviewed RFLMA Contact Record 2010-07, which documents recent monitoring results at the MDPTS and ETPTS groundwater treatment systems and the consultation that has accurred regarding those results. This contact record accuratley reports agency consultation and it is therefore approved. This approval includes the proposed action to replace the treatment media at the MSPTS. Region 8 of the Environmental Protection Agency has also reviewed this contact record and concurs with its approval.

PD-A-000312	11/2/2010
Monitoring Results and Water Treatment at the MSPTS	
Treatment of contaminated groundwater by the MSPTS and ETPTS results in removal of the vast majority of contaminantion load from influent groundwater. Treatment does not result in complete removal of all groundwater contaminants, however, and low concentrations of few volatile organic compounds (VOCs)remain in system effluent at levels that are above RFLMA Attachment 2, Table 1 standards.

RE: RFLMA Contact Record 2011-01	
The Colorado Department of Public Health and Environment has reviewed RFLMA Contact Record 2011-01, which details actions to reduce effluent concentrations of residual volatile organic compounds (VOCs) from Mound Site Treatment System. It also covers rountine mainteance to replace the ZVI media at this treatment system. Because these action are within the scope of the remedy prescribed in the CAD/ROD and they meet regulatory requirements, this contact record is approved. Region, 8 of the Environmental Protection Agency has also reviewed this contact record and concurs its approval. If this action is unsuccessful or additional are needed to futher reduce VOC concentrations in groundwater, than further consultation is required. Please let me know if you have any question regarding this approval.

FW: AMP Group notification of a reportable condition at RFLMA Point of Evaluation GS10	
In AMP Group notification of a reportable condition at RFLMA Point of Evaluation GS10 we asked for your availability the first week of July in order to schedule and AMP Group meeting to discuss the reportable condition. So far I've received only three responses, with Thursday July 7, being the common availability. Please respond if that day works for you or if you would prefer to postpone until another week. If so, please suggest several available dates so that I can schedule a meeting.

RE: Release of Proposed Plan for Amendment of Corrective Action Decision/Record of Decision (CAD/ROD)	
On June 3, 2011, the Rocky Flats Legacy Management Agreement (RFLMA) Parties, which consists of the U.S. Department of Energy (DOE), the Colorado Department of Public Health and Environment (CDPHE), and the U.S. Environmental Protection Agency (EPA) released the Proposed Plan for amending the September 29, 2006, CAD/ROD for a 30-day public review and comment period. This has since been modified to a 60-day public review period. The City of Thornton (Thornton) concurs with the City and County of Broomfield's request that the public comment and review period be extended to 90-days in order to have sufficient time to evaluate the changes to the CAD/ROD and related documents.

RE: Draft Contact Record 2011-04	
The AMP makes clear that the RFLMA process takes prededence. Now that we also have AMP group conversation piece, and difficulty in setting up mutually agreeable meeting time, ect., it is best not to wait for the AMP group input before informing public of what we are doing to address condition. We can factor in AMP group feedback when timely enough to inform the RFLAM consultative process.

RE: RFLMA Contact Record 2012-02	
The Colorado Department of Public Health and Environment (Department), in coordination with Region 8 of the Environmental Protection Agency (EPA), has reviewed Rocky Flats Legacy Management Agreement (RLAMA) Contact Record 2012-02. This contact record is consistent with the consultation with the Department and EPA, which occurred on October 16, 2012. Improving treatment at the East Trenches Plume Treatment System as proposed in this contact Record supports the objectives of the RFLMA. The Department therefore approves Contact Record 2012-02.

RE: RFLMA Contact Record 2013-01 approval	
The Colorado Department of Public Health and Environment (Department), in coordination with Region 8 of the Environmental Protection Agency (EPA), has reviewed Rocky Flats Legacy Management Agreement (RFLMA) Contact Record 2013-01. This contact record is consistent with consultation with the Department and EPA, which occurred on March 13, 2013. The Department therefore approves Contact Record 2013-01 and the accompanying Soil Disturbance Review Plan for the GS10 Flume Replacement Project.

PD-A-000498	5/2/2013
Contact Record 2013-01 - GS10 Flume Replacement project and Soil Disturbance Review Plan	
The flume for Rocky Flats Legacy Management Agreement (RFLMA) Point of Evaluation (POE) monitoring location GS10 in South Walnut Creek was originally installed in 1993. DOE considered replacing the GS10 flume in 2000, when it replaced flumes for several other monitoring locations, but it was a low priority in relation to other cleanup and closure work at the time. The new surface water configuration resulting from breaching the dams for former retention ponds B-1, B-2, B-3, and B-4 in 2009 now allows DOE to propose replacing the GS10 flume and to move its location slightly downstream.

Revisions to the Surface Water Configuration AMP	
Comments from the City and County of Broomfield regarding the revised May 2012 Adaptive Management Plan (AMP). "Due to the short timeframe allotted to provide comments to the revised May 2013 Adaptive Management Plan, I am sending some comments to you and will follow-up with a formal letter. The initial date on the approved AMP was June 2011 and per the AMP process we were to reevaluate the plan every two years. The intent of the evaluation was to evaluate data generated by the AMP sampling plan the data per Rocky Flats Legacy Management Agreement (RFLMA) requirements."

RE: RFLMA Contact Record 2013-02 Approval	
The Colorado Department of Public Health and Environment(Deaprtment), in coordination with Region 8 of the Environmental Protection Agency Agency(EPA), has reviewd Rocky Flats Legacy Management Agreement(RFLMA)Contact Record 2013-02. This contact record describes damage to the cover cause by recent stroms, which constitues a reportable condition. The Department agrees that the initial actions taken to repair the damage meet the objecteive and rationale of Institutional Control (IC) 6. The department therefore approves Contact Record 2013-02 along with its schedule for a proposed evaluation. That evaluation may result in additional proposed action being submitted for approval.

RE: Quarterly Report of Site Surveillance and Maintenance Activities-1st Quarter Calendar Year 2013	
The Colorado Department of Public Health and Environment (Department), in coordination with Region 8 of the Environmental Protection Agency, has reviewed the Site Surveillance and Maintenance Activities Report of the Frist Quarter of Calender Year 2013. This report was submitted to the Department for approval and filed in the Administrative Record as required by RFLMA 26. Our review has determind that this report meets the requirements specified in RFLMA Attachment 2 and it is therefore approved.

Final Task 8 of the Zero-Offsite Water-Discharge Study	
Final Present Landfill Area Ground-Water\Surface-Water Collection Study. Rocky Flats Plan Site.This report is one of several studies being conducted for, and in the development of, a Zero-Offsite Water-Discharge Plan for Rocky Flats Plant (RFP) in response to Item C.7 of the Agreement in Principle (AIP) between the the Colorado Department of Health (CDH) and the U.S. Department of Energy (DOE) (ASI, 1990a). Specifically, this report addresses issues related to the surface and groundwater management at the Present Landfill at the RFP. This study presents a review of analytical data associated with the groundwater/leachate, and of expected quantites of water to be managed.

RE: Site Surveillance and Maintenance Activities Report - Calender Year 2013	
The Colorado Department of Public Health and Environment (Department),in coordination with Region 8 and the Environmental Protection Agency, has reviewed the annual quarterly Site Surveillance and Maintenance Activities Reports of Calendar Year 2013. These reports were submitted to the Departments for approval and file in the administrative Record as required by RFLMA 26. Our review has determind that these report meet the requirements in RFLMA Attachment 2 and they are therefore approved.

RE: RFLMA Contact Record 2014-07 approval	
The Colorado Department of Public Health and Environment (Department), in coordination with Region 8 of the Environmental Protection Agency (EPA), has reviewd Rocky Flats Legacy Management Agreement (RFLMA) Contact Record 2014-07. This contact record decribes the proposed abandonment of Sentinel Well 88104. This contact record is consistent with consultation with the Department and EPA, which occurred on June 2, 2014. The Department also concurs that this exception to the decision rule in figure 8 in Attachment 2 of RFLMA is acceptable because of the redundancy of monitoring well coverage in the immediate area. The Department therefore approves Contact Record 2014-07.	
https://lmpublicsearch.lm.doe.gov/sitedocs/PD-A-000602.pdf	38 KB

PD-A-000603	7/21/2014
Abandonment of Sentinel well 88104 at the Rocky Flats Site, Colorado.	
Discussion: Sentinel well 88104 casing is broken within the screened interval approximately 10 feet below ground surface. This well monintors groundwater downgradient of former Building 881 (B881). The broken casing was observed during the second quarter 2014 sampling event, and it was noted that several feet of the well casing has filled with filter-pack sand.

RE: DRAFT RFLMA CR 23014-8 Provide flexibility to the flow configuration at the Solar Ponds Treatment System (SPPTS) as part of the ongoing optimization effort	
Considering adding, "A hole approximately 8 feet x 8 feet and 6 feet deep will be excavated" to the Soil Disturbance Review plan #1. It's stated in the CR, but would be appropriate to repeat it here to fully describe the extent of the project.	
https://lmpublicsearch.lm.doe.gov/sitedocs/PD-A-000605.pdf	9 MB

PD-A-000606	7/18/2014
RE: RFLMA Contact Record 2014-08 approval	
The Colorado Department of Public Health and Environment (Department), in coordination with Region 8 of the Environmental Protection Agency, (EPA), has reviewd Rocky Flats Legacy Management Agreement (RFLMA) Contact Record 2014-08. This contact record describes the a modification to the flow configuration between components at the Solar Ponds Plume Treatment System (SPPTS). Because this project includes an excavation approximately six feet deep, a Soil Distrubance Review Plan is required. The Department therefore approves Contact Record 2014-08.	
https://lmpublicsearch.lm.doe.gov/sitedocs/PD-A-000606.pdf	38 KB

PD-A-000607	7/18/2014
Provide flexibility to the flow configuration at the Solar Ponds Plume Treatment System (SPPTS) as part as part of ongoing optimization effort.	
Discussion: The ability to alter the flow configuration between treatment componemnts will support ongoing efforts to optimize the operation and effectiveness of the SPPTS at the Rtocky Flats Site, Colorado. The exisiting piping between the treatment componments will be modified to provide the needed flow-configurations flexibility.

PD-A-000728	12/15/2014
RE: Modification to the Present Landfill Monitoring and Maintenance Plan	
The Colorado Department of Public Health and Environment (CDPHE), in coordination with Region 8 of the Environmental Protection Agency, previously approved Contact Record 2014-03. That contact record outlines minor changes to the Present Landfill Monitoring and Maintenance Plan, which is an enforceable requirement of the Rocky Flats Legacy Management Agreement. These changes eliminate for landfill-specific vegetation monintoring, since the vegetation has met the specified success criteria. Human health and environment continue to be protected under these changes and therefore the modifications are approved.

PD-A-000732	1/5/2015
RE: Contact Record 2014-10	
The Colorado Department of Public Health and Environment (CDPHE) approval Contact Record 2014-10 on December 18, 2014. That contact record addressed a reportable condition for uranium at WALPOC. Internal consultation at CDPHE clarified the applicabiliy of Water Quality Control Commission Regulations No. 31 and No. 38 to surface water exceedance at Rocky Flats. Contact Record 2014-10 included references to the hyphenated state-wide surface water standard for unranium in Regulation No. 31 as part of the rationale for addressing the exceedance. Those references, however, are not consistent with the standards in the RFLMA. Therfore, approval of that contact record is rescinded and DOE is asked to show Contact Record 2014-10 as withdrawn. A new contact record should be drafted to document DOEs response to the exceedance.	
https://lmpublicsearch.lm.doe.gov/sitedocs/PD-A-000732.pdf	36 KB

PD-A-000733	1/5/2015
Reportable condition for unranium 12 months rolling average at Point Of Compliance WALPOC	
CDPHE rescinded approval of this Contact Record on January 5, 2015. Contact Record RFLMA CR 2015-01 replaces this Contact Record. A reportable condition is excepted to occur at surface water Point of Compliance (POC) WALPOC at the Rocky Flats Site, Colorado for the period from November 1, 2013, through October 31, 2014. The automated composite sample for the period on October 23-31, 2014, has not been retrieved from the field as of November 19, 2014, because the collected sample volume in the carboy is not of sufficient quantity for analysis.

Notification that DOE plans to take immediate action to resolve excessive groundwater flows at the Original Landfill (OLF)	
This e-mail is providing notification as required by the Original Landfill (OLF) Monintoring and Maintenance Plan, Section 6.0 Reporting and Contact Information that the Department of Energy plans to take immediate action to resolve excessive groundwater flows under the OLFs East Perimeter Channel and the eastern most edge of the cover. This action is an ongoing effort to resolve the reportable condition identified in the CR 2013-02 Reportable Condition at the Original Landfill (OLF). A Contact Record addressing the consultation with the regulators concerning this action and describing the action taken or planned to be taken will be issued in the near future.	
https://lmpublicsearch.lm.doe.gov/sitedocs/PD-A-000742.pdf	157 KB

PD-A-000743	5/19/2015
RE: Notification that DOE plans to take immedate action to resolve excessive groundwater flows at the Original Landfill (OLF)	
This latest movement on the OL began right after we completed the action proposed following last years slumping, reportable condition and Contact Records. We are handling the latest movement and our immediate responses as a continuation of the original reportable condition and actions.

PD-A-000746	5/26/2015
Original Landfill (OLF) Immediate Response to Recent Precipitation	
The past serveral weeks of precipitation events have led to unusually high groundwater volumes that, have caused portions of the Original Landfill (OLF) particularly in the area of the East Perimeter Channel (EPC)-to sudside. This movement is evident over daily to weekly periods and is appearing as surficial cracks, settling (depressions), or rotational slumping. Repairs that have been completed on these features have needed to be repeated multiple times because the ground surface contiunes to move. These repairs have not been able to keep up with the recent movements.

RE: Contact Record 2015-07 - Vinyl chloride in Present Landfill Seep	
The Colorado Department of Public Health and Environment (CDPHE), in coordination with Region 8 of the Environmental Protection Agency, has reviewed draft Contact Record 2015-07. This contact record described the U.S. Department of Energy s response to an exceedance of surface water standard (i.e..practial quantitation limits or PQL)for vinyl chloride in the Present Landfill Treatment System effluent. The response included three subsequent monthly sampling events, which led to sampling at the NNGO1 location. Because the ressults from the sampling at NNGO1 were below the method limit, no further sampling was requried.

RE: Contact Record 2015-08	
The Colorado Department of Public Health and Environmental (CDPHE), in coordnation with Region 8 of the Environmental Protection Agency, has reviewed draft Contact Record 2015-08. This contact record points out that several modifications have been made to the Solar Ponds Plume Treatment System (SPPTS) in past attempts to optimize the process. A new full-scale treatment process is described that uses existing infrastructure to accommodate lagoons - a type of bacterial treatment that has proven successful on a polit scale in removing both nitrate and uranium.	
https://lmpublicsearch.lm.doe.gov/sitedocs/PD-A-000767.pdf	43 KB

PD-A-000768	9/17/2015
RE: DOE has posted a new contact records to the Rocky Flats Legacy Management website	
The email notification of the posting of contact record CR 2015-08 had an error in the narrative of the e-mail. As described in the contact record, the proposed interim configuration is intended to improve nitrate treatment, not uranium treatment.	
https://lmpublicsearch.lm.doe.gov/sitedocs/PD-A-000768.pdf	40 KB

PD-A-000769	9/8/2015
Solar Plume Treatment System Interim Design Implementation	
The Solar Ponds Plume Treatment System (SPPTS) at Rocky Fltas, Colorado, Site collects and treats water contaminated with nitrate and uranium. As describe in several annual reports (especially the annual reports for 2006, 2007, 2008, and 2009) and documented in Contact Records 2007-002, 2008-06, 2008-08, 2009-01, and 2014-08, the SPPTS has been the focus of extensive study and modification over the past several years, pacrticulalarly since the site close.

PD-A-000776	12/3/2015
Notification of Reportable Condition at AOC well 10304	
Analytical results for the fourth-quarter 2015 sample collected October 29, 2015 from AOC well 10304, located downgradient of the 903 Pad/Ryan's Pit Plume, were validated on December 1, 2015. The concentration of TCE in this sample was reported at 72 ug/L. The corresponding RFLMA standard is 2.5 ug/L. As discussed in the second-quarter 2015 report, the concentration of the sample collected during that quarter (15 ug/L) also exceeded the TCE standard. Because this fourth-quarter sample represents the second consecutive routine semiannual sample in which concentrations have exceeded a RFLMA standard, in accordance with RFLMA Attachment 2, Figure 7, a reportable condition exists at this AOC well.	
https://lmpublicsearch.lm.doe.gov/sitedocs/PD-A-000776.pdf	40 KB

PD-A-000777	12/8/2015
Informal Notification of a Reportable Condition as Specified in the Rocky Flats Site Adaptive Management Plan (AMP)	
Analytical results for the fourth-quarter 2015 sample collected October 29, 2015 from AOC well 10304, located down-gradient of the 903 Pad/Ryan's Pit Plume, were validated on December 1, 2015. The concentration of TCE in this sample was reported at 72 ug/L. The corresponding RFLMA standard is 2.5 ug/L. As discussed in the second-quarter 2015 report, the concentration of the sample collected during that quarter (15 ug/L) also exceeded the TCE standard. Because this fourth-quarter sample represents the second consecutive routine semiannual sample in which concentrations have exceeded a RFLMA standard, in accordance with RFLMA Attachment 2, Figure 7, a reportable condition exists at this AOC well.

PD-A-000780	12/7/2015
Soil Disturbance Review Plan for Solar Ponds Plume Treatment System Interim Configuration	
Contact Record 2015-08, "Solar Ponds Plume Treatment System Interim Design and Implementation," summarizes the Rocky Flats Legacy Management Agreement (RFLMA) parties' consultation and decision to convert the current Solar Ponds Plume Treatment System (SPPTS) Cell 1 and Cell 2 structure (the "Big Box"), which is currently filled with wood chips, mulch, and soil over treatment media consisting of sawdust mixed with zero-valent iron (ZVI) in Cell 1 and pea gravel mixed with ZVI in Cell 2, into a lagoon for the removal of nitrate. Testing for uranium removal approaches will be conducted on a portion of the lagoon effluent. The use of a lagoon to reduce nitrate has been demonstrated in the Phase III pilot-scale lagoon studies. Information on the status of operation and performance of the SPPTS is provided in RFLMA quarterly and annual site surveillance and maintenance reports. RFLMA contact records and site surveillance and maintenance reports are available on the Rocky Flats public website

PD-A-000784	12/16/2015
Regulatory Contact Record CR 2015-10 - Area of Concern Well 10304 Reportable Condition	
Background: The Rocky Flats Legacy Management Agreement (RFLMA) defines several categories of groundwater monitoring wells at the Rocky Flats Site. Of these, Area of Concern (AOC) wells have reportable conditions defined. AOC wells are located within a drainage and downgradient of one or more contaminant plumes and are monitored semiannually to determine whether the plume(s) may be impacting surface water quality. The primary objective of AOC well 10304 is to evaluate groundwater quality adjacent to Woman Creek, downgradient of the 903 Pad/Ryan's Pit Plume.

PD-A-000804	7/28/2016
Regulatory Contact Record CR 2016-03 - Geoprobe Investigation of the Groundwater System Upgradient of the Original Landfill and the Soil Disturbance Review Plan	
Contact Record (CR) 2015-03, May 26, 2015, approved immediate action to address areas of subsidence and the resulting standing water on portions of the surface of the Original Landfill (OLF). This subsidence was caused by several weeks of precipitation in the spring of 2015. (May 2015 has been noted as the wettest May in Colorado's recorded history.) The immediate action was successful in improving drainage of water on the surface of the OLF. In September 2015, CR 2015-06 approved an action to contour the East Perimeter Channel (EPC) and the eastern edge and western side of the OLF to reestablish surface water flow off the OLF cover towards Woman Creek, and lay back a large scarp at the top of the EPC as a short-term action. However, in the spring of 2016, the EPC and some of the surrounding area slumped, but not as significantly as in 2015. Therefore, the slope instability continues as an ongoing issue.

PD-A-000828	2/1/2017
Surface Water Configuration Adaptive Management Plan Annual Report Calendar Year 2016 - February 2017 (LMS/RFS/S15715)	
The proposed action assessed in the Rocky Flats Site, Colorado, Surface Water Configuration Environmental Assessment (DOE 2011) and the resulting Finding of No Significant Impact (FONSI) is to breach the remaining retention pond dams at the Rocky Flats Site, Colorado, (Site) to allow surface water flow to return to approximately the same conditions that were present before construction of the retention ponds. Based on extensive water quality monitoring data and a thorough environmental review, and as stated in the FONSI, the U.S. Department of Energy (DOE) Office of Legacy Management has determined that the proposed action does not present a significant impact on the environment under the National Environmental Policy Act evaluation criteria
