pCi/g	picocuries per gram
U	Analyte not detected
ug/kg	micrograms per kilogram
UJ	Detection limit is approximate
UJz	Blank contamination, treat as non-detect

Appendix E

Soil Disturbance and Tree/Shrub Removal Permit

This page intentionally left blank

PERMIT APPLICATION FOR SOIL DISTURBANCE AND TREE/SHRUB REMOVAL AT LEHR SUPERFUND SITE

This section to be completed by unit performing work.

Work requested by: _____

_____

Work to be performed by: _____

_____

Schedule: _____

_____

Describe proposed work, or attach documents describing scope: _____

_____

_____

_____

_____

_____

Anticipated depth of soil disturbance, if any: _____

_____

☐ Map indicating project location(s) and anticipated area(s) of soil disturbance, if any, is attached.

☐ List project plans submitted with application: _____

_____

_____

_____

Requestor Signature: _____

Unit: _____

Name/Title: _____

Date: _____

PERMIT CONDITIONS

This section to be completed by EH&S Unit.

☐ Soil disturbed or trees/shrubs to be removed are in areas not subject to SMP for DOE areas. No SMP conditions apply.

STOP HERE.

☐ Work to be performed in areas subject to SMP for DOE areas.

☐ Site inspection conducted (date)_____

_____

☐ Possible to relocate work to avoid soil disturbance in area subject to SMP. Discussed with project requestor. Describe, and attach site map with alternate location(s): _____

_____

_____

_____

_____

☐ Requestor agrees to relocate work to area not subject to the SMP. Attach new map showing new project location. **STOP HERE.**

☐ Project will disturb soil or remove trees/shrubs in area(s) subject to the SMP per survey maps and legal descriptions of DOE areas subject to land-use restrictions. The conditions checked below will be in effect:

- ☐ All project staff must be trained on aspects of the SMP relevant to their work.
- ☐ Soil disturbed at 0–10 feet below ground surface or removed trees/shrubs will be sampled for constituents in attached table. (attach SMP Table 1 and indicate sections applicable to area being disturbed.)
- ☐ Soil disturbed at 0–10 feet below ground surface or removed trees/shrubs contaminated above site background may not be reused on site without a risk assessment approved by DTSC and EPA. Soil or trees/shrubs with contaminant concentrations at or below background will be considered clean and may be reused on site.
- ☐ Soil disturbed at >10 feet below ground surface will be sampled for constituents determined by professional judgment to be potentially present in the soil in concentrations above site background (source: Appendix D of the SMP).
- ☐ Soil disturbed at >10 feet below ground surface will not be reused on site without a risk assessment approved by DTSC and EPA if it contains contaminant concentrations above the site background. Soil with contaminant concentrations below background values will be considered clean and may be reused on site.
- ☐ Non-soil waste (e.g., personal protective equipment) contaminated from contact with site soil must be characterized and managed according to its designation.
- ☐ The characterization of all waste is the responsibility of the requesting party.
- ☐ Results of any soil or vegetation scan/sampling/characterization activities associated with this soil disturbance or tree/shrub removal will be submitted to the EH&S Unit.
- ☐ Provide map of tree/shrub removal or soil excavation, soil reuse locations, volumes of soil reused, and/or volumes of soil disposed of, and documentation of disposal.
- Oversight by an environmental professional is required on a/an [frequency]_____ ___ basis.
- ☐ Inspection by the EH&S Unit to be conducted on a/an [frequency] _____ _____ basis.

☐ If unusual or unexpected conditions are discovered, such as discoloration or unexpected contamination, during this soil disturbance, the project requestor will immediately notify the EH&S Unit. The EH&S Unit will coordinate the notification of DOE and the regulatory agencies concerning the unexpected conditions.

Environmental Professional Review. (List documents reviewed and comments on the project's compliance with the SMP; the ROD; and all applicable laws, regulations, and standards.)

_____

Tree and Shrub Inventory

This page intentionally left blank

Tree and Shrub Inventory

In 2016, at the request of DOE, a UC Davis professional arborist assessed trees and shrubs exceeding 6 feet in height and within, or with canopies extending over, the DOE areas subject to land use controls (UC Davis 2016; DOE 2019). Locations of trees and shrubs were recorded on an aerial survey map, and specific information—including trunk diameter, overall height, and a general health rating—were documented in a table provided by the UC Davis campus arborist. The map and table have been updated (Figure F-1 and Table F-1) as trees and shrubs were added or removed from the inventory. Changes to the inventory include:

- In 2017, the Public Works Division of the Solano County Department of Resource Management disposed of three California black walnut trees (specimens 16192, 16193, and 16194) as documented in the 2019 SMP update (DOE 2019).
- A white mulberry tree (specimen 16195) was determined not in or near DOE areas subject to this SMP; this also was documented in the 2019 SMP update.
- A small elderberry shrub (specimen 16222) found dead and fallen in the EDPs Area in 2019 (DOE 2020) was managed according to the procedures established in the 2019 SMP update, as documented in *2020 Annual Land-Use Covenant Inspection Report for DOE Areas at the Laboratory for Energy-Related Health Research/Old Campus Landfill Superfund Site, University of California, Davis* (DOE 2021).
- In 2021, an Aleppo pine sapling was identified adjacent to the northeast corner of the SWT area (Figure F-1). A campus identification number has been requested.
