MEMORANDUM

TO : Heads of Divisions and Managers of Operations DATE: December 6, 1954

FROM : John A. Derry, *John A. Derry*
Division of Construction and Supply, Washington

SUBJECT : AEC CONTRACTS OVER \$1,000,000 - ACTIVE SEPTEMBER 30, 1954

SYMBOL : CSCE-R:RHH

The attached tabulation of active AEC contracts over \$1,000,000 has been prepared as a result of recurring requests for information on our larger contracts. It consists of Part I - Prime Contracts and Part II - Sub-contracts, and lists the contracts alphabetically by Operations Office to show; (1) type of work being performed by the contractor; (2) contract number; (3) accumulated dollar obligation; (4) type of contract, i.e., cost type or fixed price; and, (5) the estimated completion date.

Information for this report was taken from field reports submitted pursuant to Chapter 9127 of the AEC Manual. This chapter provides for reporting on all types of contracts except those for acquisition of land and source materials. It further provides that all AEC contracts will be cataloged into the following seven categories:

1. Architect-Engineer (AE)
2. On-Site Construction
3. Research and Development (R&D)
4. Materials, Supplies and Equipment for Construction (MSE-Cons.)
5. Materials, Supplies and Equipment, Other (MSE-Other)
6. Rents and Utility Services
7. Other Services

Due to the difficulty of accurately estimating completion dates, this report lists contracts which were due to have been completed during the last three months. The word "open" used in the completion column indicates that no completion date has been specified by the field.

The Division of Construction and Supply will furnish additional copies of this tabulation on request.
