Mr. Andrew Wallo, III, NE-23
Division of Facility & Site
Decommissioning Projects
U.S. Department of Energy
Germantown, Maryland 20545

Dear Mr. Wallo:

STATUS OF ACTIONS - FUSRAP SITE LIST

Aerospace recently completed a comprehensive review of sites listed in the FUSRAP Site Investigation and Remedial Action Summary Report, dated December 31, 1986. The primary objectives of this review were to examine the status of each site identified in Sections II and III of the Report with respect to actions required to complete the Identification and Characterization Process; to provide DFSD a current status of these actions; and to identify and evaluate measures to expedite the process by eliminating repetition in the preparation of reports and memoranda required to formally document individual site designation and elimination decisions made by DFSD.

The review was conducted in two phases. The first phase addressed the 217 sites eliminated from further consideration as candidates for remedial action under FUSRAP that are identified in Section III of the Report. The second phase of the review addressed the 132 sites identified in Section II of the Report that are currently under investigation or consideration. The principal focus of the second phase of the review was to identify those sites that have been referred to other elements of the Department, to the Nuclear Regulatory Commission and to the Department of Defense for further study and appropriate action.

Sites listed in Section III of the report are included in Enclosures 1 through 5. The sites listed in these enclosures have been eliminated from further consideration under FUSRAP. In addition to the list of sites, each enclosure contains a brief statement of the status of Aerospace actions and, where appropriate, recommendations to expedite the formal documentation of elimination decisions and closeout of site files.

Sites identified in Section II of the Report are included in Enclosures 6 and 7. The sites listed in these enclosures are under investigation or consideration to determine if there is a potential for residual radioactive

Mr. Andrew Wallo, III

Page 2

contamination from operations conducted in support of MED or AEC activities and if the Department has authority to conduct remedial action, if required. In addition to the list of sites, the enclosures contain a brief statement of the status of Aerospace actions and, where appropriate, recommended actions to expedite the Identification and Characterization Process.

The following is a summary of the recommendations presented in the enclosures for your consideration.

1. That Aerospace terminate the Identification and Characterization Process with respect to those sites identified in Enclosure 2 that are being addressed under other programs; and, that your approval of this letter serve as the record of elimination decision and authority for Aerospace to close out the respective site files.
2. That Aerospace terminate the Identification and Characterization Process with respect to the sites identified in Enclosure 3 that have been transferred to other elements of the Department and to the Department of Defense and the Nuclear Regulatory Commission for consideration and appropriate action; and, that the correspondence referenced in the enclosure serve as the record of elimination decision and authority to close out the files of the sites identified therein.
3. That Aerospace terminate the Identification and Characterization Process with respect to those sites identified in Enclosure 4 that were eliminated from further consideration under FUSRAP based upon indications that the potential for residual contamination at the sites is remote; and, that approval of this letter serve as the record of elimination decision and authority for Aerospace to close out the respective site files.
4. That Aerospace summarize information from records on file for each of the sites identified in Enclosure 5 known to have been licensed by the AEC or NRC; that the information assembled be forwarded to the NRC by letter referring the sites for their consideration and appropriate action; and, that the referral letter serve as the record of elimination of those sites from FUSRAP and authority to close out the files of sites identified therein.
5. That the sites listed in Enclosure 6 be eliminated from further consideration for remedial action under FUSRAP; that the update of the FUSRAP Site Investigation and Summary Report reflect a transfer of information pertaining to these sites from Section II to Section

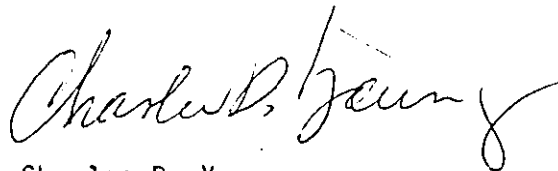

Mr. Andrew Wallo, III
26 May 1987
Page 3

III; and, that the correspondence referenced in the enclosure serve as the record of elimination decision and authority to close out the respective site files.

In anticipation of your approval of these recommendations, Aerospace efforts will be directed toward documentation of elimination decisions and close out of the site files for those sites identified in Enclosure 5, and the continuation of records searches and compilation of data to determine the potential for residual radioactive contamination at the sites identified in Enclosure 7.

Please call me if you have questions regarding the recommendations presented above or the material presented in the enclosures.

Sincerely,

Charles D. Young
Project Engineer
Government Support Directorate
Architecture Planning and
Technology Division

<u>SITE NAME</u>	<u>LOCATION</u>	<u>REMARKS</u>
Virginia-Carolina Corp. National Bureau of Standards	Richmond, VA Washington, DC	Note 1 Note 4

Note 1. Elimination action included preparation of a Federal Register Notice.

Note 2. Final elimination reports or authority reviews approved by DFSD.

Note 3. Record of elimination - Memoranda to File. Elimination decisions for sites in this category are based upon absence of indication that there is potential for residual radioactive contamination from MED or AEC operations.

Note 4. Final elimination reports, site summaries and draft letters of notification were delivered and approved by DFSD.

Note 5. Final elimination package (described in Note 4) were delivered - under review by DFSD (5/14/87).

Note 6. Elimination of the site from consideration under FUSRAP is documented by Aerospace letter dated 8 March 1984, subject: Review of Information on the Marion Mill Site, Colorado, to Support DOE FUSRAP Eligibility Analysis; and DOE letter to Vranesh and Raisch (Law Firm) dated 7 August 1986.

ENCLOSURE 2

SITES ELIMINATED FROM FUSRAP - ADDRESSED UNDER OTHER PROGRAMS

STATUS: The sites listed below were eliminated from consideration under FUSRAP based upon information that the responsibility of remedial action, environmental monitoring and/or control of these sites has been assumed by other DOE programs or offices or other Federal agencies. The responsible Program, Office, or other Federal agency is identified under Remarks.

RECOMMENDATIONS: That Aerospace terminate the Identification and Characterization Process with respect to the sites listed below and that approval of the recommendations contained in the letter to which this enclosure is appended serve as a record of elimination decisions and authority for Aerospace to close out the respective site files.

<u>SITE NAME</u>	<u>LOCATION</u>	<u>REMARKS</u>

Monticello Uranium Mill	Monticello, UT	SFMP
Riverton Ore Buying Station	Riverton, WY	UMTRAP

Note 1. "Orphan Site". Federal Register Notices were prepared and documentation was forwarded to DOE Office of Operational Safety, Environmental Protection Division by Aerospace letter dated 29 March 1985.

Note 2. Remedial action was completed - site was released with restrictions and is monitored by DOE.

Note 3. TVA is responsible for cleanup of the processing site (Mill and Tailings Pile). UMTRAP is responsible for cleanup of vicinity properties.

ENCLOSURE 3

SITES ELIMINATED FROM FUSRAP - NO AUTHORITY - TRANSFERRED

STATUS: The sites listed below were eliminated from consideration under FUSRAP based upon determinations that there is no authority under the Atomic Energy Act of 1954, as amended, to conduct remedial action if such is required. The basis for the determinations were as follows:

- o The sites were operated under AEC license. Responsibility for clean up was a condition of license termination under jurisdiction of AEC or NRC. Four sites were referred to the NRC for consideration and appropriate action by DOE letter dated May 14, 1986.
- o The sites were used in support of the AEC Feed Materials Production Center (FMPC - Fernald, OH) and were operated under direct supervision of the National Lead Company of Ohio, the AEC prime contractor for operation of the FMPC. These sites were referred to the Procurement and Contracts Division (AD-42), Oak Ridge Operations Office (ORO) for consideration and appropriate action under the NLO contract by letter dated 28 July 1987.
- o The sites were located on Department of Defense (DOD) facilities that were returned to the appropriate Service (Army, Navy or Air Force) when MED or AEC tenant operations were completed. No records have been found that indicate a potential for residual radioactive contamination at any of the sites in this category.

RECOMMENDATIONS: That Aerospace terminate the Identification and Characterization Process with respect to the sites listed below and that the correspondence referenced above that referred the sites to the NRC, the Oak Ridge Operations Office and the Department of Defense serve as the record of elimination decisions and authority for Aerospace to close out the respective site files.

<u>SITE NAME</u>	<u>LOCATION</u>	<u>REMARKS</u>
Ajax Magnethermic Corporation	Youngstown, OH	NRC
Cincinnati Milling & Machine Co.	Cincinnati, OH	ORO, Note 1
Knoxville Iron Company	Knoxville, TN	NRC
Morgantown Ordnance Works	Monogalia County, WV	DOD

Note 1. Sites are currently operating under active NRC license.

ENCLOSURE 4

SITES ELIMINATED FROM FUSRAP - RESEARCH FACILITIES (UNIVERSITIES)

STATUS: The twenty-six universities identified below were eliminated from further consideration under FUSRAP based upon information that the work done under contract with the MED and AEC was limited to a research environment and involved only small quantities of radioactive material. No information was found that would indicate a potential for residual radioactive material from these operations. The probability of finding information to the contrary is considered remote. Therefore, further investigation is not warranted.

RECOMMENDATIONS: That Aerospace terminate the Identification and Characterization Process with respect to these sites and that approval of the recommendations contained in the letter to which this enclosure is appended serve as a record of elimination decisions and authority for Aerospace to close out the respective site files.

SITES ELIMINATED FROM FUSRAP - AEROSPACE ACTION REQUIRED

STATUS: The sites listed below have been eliminated from further consideration under FUSRAP based upon information contained in respective site files. Documentation of the elimination decisions requires completion of elimination reports or memoranda to file that identify records supporting the decision. AEC or NRC licensed sites are indicated under Remarks. Elimination of a majority of the remaining sites (not licensed) will be recorded by Memoranda to File.

RECOMMENDATIONS: That Aerospace summarize information from records on file for each of the sites known to have been licensed by the AEC or NRC; that the information assembled be forwarded to the NRC by letter referring the sites for their consideration and appropriate action; and that the referral letter serve as the record of elimination of those sites from FUSRAP.

ENCLOSURE 6

SITES UNDER INVESTIGATION/CONSIDERATION - NO AUTHORITY - TRANSFERRED

STATUS: The sites listed below remain on the FUSRAP list of sites under consideration or investigation. However, these sites have been referred for consideration and appropriate action by the office or agency identified under Remarks. The justification for these actions were as follows:

- o The sites were operated under subcontract with the National Lead Company of Ohio (NLO), the prime contractor-operator of the Feed Materials Production Center (FMPC) located in the vicinity of Fernald, Ohio. The sites were referred to the Procurement and Contracts Division of the Oak Ridge Operations by Department of Energy Memorandum, subject: Commercial Facilities Used by National Lead Company of Ohio in Support of FMPC Operations, dated July 28, 1986, for radiological characterization and remedial action, if required, under the Department's contract with NLO.
- o The sites were located on Department of Defense (DOD) facilities or facilities formerly operated by a military service (Army, Navy or Air Force), or were located on facilities that were returned to the appropriate military service when MED or AEC tenant operations were completed. A summary of information pertaining to each of the sites is included in Aerospace letter dated 30 March 1987, subject: Former DOD Installations/Facilities Used in Support of MED/AEC Operations.

RECOMMENDATIONS: That Aerospace transfer the sites identified below from the list of FUSRAP sites under consideration or investigation (Section II) to the list of sites eliminated from further consideration (Section III); and that a copy of your approval of the letter to which this enclosure is appended serve as the record of elimination and authority to close out the respective site files.
