Dear Mr. Pucciarelli:

Enclosed is a signed copy of the consent form for the survey of your property. By copy of this letter I am directing our contractor, Oak Ridge National Laboratory (ORNL), to arrange a time with you for a site visit and screening survey.

Thank you for your prompt attention to this matter. If you have any questions, please call me at 301-353-5439.

Sincerely,

191

CONSENT FOR PROGRAM ACCESS
SURVEYS AND ENGINEERING STUDIES

The undersigned persons (hereinafter individually and collectively referred to as "Owner") represent that they own the following property:

Conviber, Inc.

644 Garfield Street

Springdale, Pennsylvania 15144

The following matters are understood by the Owner:

The United States of America (the "Government"), acting through the U.S. Department of Energy (DOE), will provide or contract for radiological surveys and engineering assessments for the following purposes: (1) DESIGNATION - determining if there is radiological contamination on the property for which DOE has authority and sufficient to require remedial action. If the property is designated for remedial action, the next step will be (2) CHARACTERIZATION - accurately defining the extent of contamination in order to design remedial action.

DOE shall be responsible for loss or destruction of, or damage to, the Owner's real and personal property caused by the activities of DOE, their authorized representatives, agents, contractors and subcontractors, in exercising any of the rights granted in this Agreement; PROVIDED, that such responsibility shall be limited to restoration of such real and personal property to a condition comparable to its condition immediately prior to the conduct of any activities on the Property by techniques of backfilling, seeding, sodding, landscaping, rebuilding, repair or replacement.

If the property is not designated for remedial action, this agreement will terminate upon completion of the designation survey. If the property is designated for remedial action, this agreement will remain in effect until completion of the characterization.

Nothing in this document shall be deemed to obligate the Owner to enter into an agreement for the performance of remedial action. No remedial action shall be performed until and unless (1) DOE shall have determined the need for and selected the appropriate remedial action, and (2) the DOE and Owners have entered into a written agreement providing for the performance of such remedial action.

By signing this document and sending it to the DOE, the Owners grant, effective 6/3/88, to the DOE and its contractors and subcontractors, such access to the Property as is reasonably required, and at times satisfactory to the Owners, for the performance of the radiological surveys and engineering studies.

The radiological surveys and engineering studies will involve some or all of the following activities:

Reviewing existing building, structural, and site plans available to the Owner. Such plans shall be provided to DOE and its contractors, at no cost to the Owner. If such plans are not in the possession of the Owner but are available, the Owner agrees to permit the DOE and its representatives to borrow or acquire, at no cost to the Owner, those plans deemed necessary to facilitate the performance of these reviews.

Performing land surveys and placing survey stakes as required to characterize the premises, including any light clearing of vegetation that may be required.

Determining the location and extent of actual radioactive material on the premises through measurements by various techniques and/or removing samples of contaminated materials by digging or core drilling.

Measuring and examining the premises and structures thereon.

Documenting through photographs the existing conditions of the Property and structures thereon.

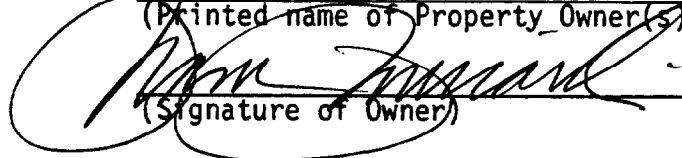

Taking radiation measurements and performing core drilling inside structures, in such a manner as is agreeable to the Owner; placing a small radiation monitor in the structures, and collecting a sample from the monitor periodically.
