REPLY TO

ATTN OF: EM-421 (W. A. Williams, 903-8149)

SUBJECT: Authorization for Remedial Action at the Former C. H. Schnoor & Company Site, Springdale, Pennsylvania

TO: Manager, DOE Oak Ridge Field Office

This is to notify you that the former C. H. Schnoor & Company facility in Springdale, Pennsylvania, is designated for remedial action under the Formerly Utilized Sites Remedial Action Program (FUSRAP). This notification does not constitute a FUSRAP baseline change control approval. Approval of the baseline change will be accomplished through the normal baseline change control procedures.

The site was used by the former Manhattan Engineer District for the machining and shaping of uranium metal during the 1940s. A radiological survey found residual uranium under the building slab and small amounts of residual uranium in soil outside the building. Because of the limited extent of the contamination, the site may be remediated using the expedited cleanup process now under development.

R. P. Whitfield
Deputy Assistant Secretary
for Environmental Restoration
