Re: Record of Decision
Colonie FUSRAP Site
Vicinity Properties- Operable Unit 3
NYSDEC Site No. 401006

Dear Mr. Moore:

The New York State Department of Environmental Conservation and the New York State Department of Health (DOH) have reviewed the September 2017 Record of Decision(ROD) for the Colonie FUSRAP Vicinity Property Operable Unit 3. This ROD provides the details on the remedial activities conducted by the United States Army Corp of Engineers (USACE) on the fifty-six Vicinity Properties (VPs) adjacent to the Colonie FUSRAP Main Site and the remedial actions involving indoor dust in some of the VPs (1144 Central Avenue, 1144A Central Avenue, 1148 Central Avenue and 78 Yardboro Avenue).

The remedial actions have successfully addressed the potential for exposure of site-related contaminants in both the soils and the indoor dust containing uranium inside of the identified vicinity properties. The USACE has decided that no further remedial action is needed.

Based on our review of the documents provided by USACE, the State concurs with the ROD that the remedy is protective of public health and the environment. Please contact Mr. John Abunaw at 518-402-8776 if you have any questions.

Sincerely,

Robert W. Schick, P. E.
Director
Division Environmental Remediation
