## SEP 28 2012

Mr. Anthony Jadevero State Electrical Construction 1110 Central Avenue Albany, NY 12205

Dear Mr. Jadevero,

Thank you for your letter of September 14, 2012 to Regional Administrator Judith Enck which has been referred to me for response. Your letter indicated that you have not been able to obtain information regarding several monitoring wells located on your facility which you believe may be associated with the U.S. Army Corps of Engineers (USACE) Colonie Interim Storage Site remedial project.

I have contacted Mr. Allen Roos, Chief, Environmental Branch, New York District Corps of Engineers who was recently made aware of your letter. He indicated that the Project Manager for the site would be contacting you shortly (if in fact he hasn't already).

Please let me know if you don't receive the information you have requested so that I can follow up with the appropriate USACE staff directly. I can be contacted at 212 637-4435 or by email at carpenter.angela@epa.gov.

Sincerely,

Angela Carpenter, Chief Special Projects Branch Emergency and Remedial Response Division

Cc: A. Roos, USACE - NYD
