West Suffield, CT 06093

Subject: Combustion Engineering Buildings 3 and 6
Kreisinger Labs and Hot Waste Vault
Windsor, CT

Dear Mr. Stewart:

The State Historic Preservation Office acknowledges receipt of the written and photographic documentation, including pertinent digital files, prepared by Historical Technologies concerning the above-named project. This office further acknowledges receipt of Historical Technologies' article submission to the *Society for Industrial Archeology New England Chapters Newsletter*. We believe that the submitted materials are consistent with our documentation standards and succinctly record the historic, architectural, and engineering aspects of the Kreisinger Labs and Hot Waste Vault (Buildings 3 and 6, respectively).

The State Historic Preservation Office has transferred the documentation materials to the Thomas J. Dodd Research Center at the University of Connecticut (Storrs) for permanent archiving and public accessibility.

This office appreciates Historical Technologies' efforts to professionally manage and document Connecticut's cultural heritage.

This comment updates and supersedes all previous correspondence for the proposed undertaking. In this regard, we believe that no further coordination and/or mitigative measures are warranted regarding the ABB Windsor remediation project.

For further information please contact Dr. David A. Poirier, Staff Archaeologist.

Sincerely,

David Bahlman
Deputy State Historic Preservation Officer
