U. S. Atomic Energy Commission
Tonawanda Sub-Office
P. O. Box 8
Kenmore 17, New York

Attention: Mr. F. J. Epp

Gentlemen:

Pursuant to the suspension of production activities at this installation it is our desire to be relieved of further accountability of the Source and Fissionable materials indicated below:

Standard brown oxide	- 451 gms.
Standard black oxide	- 208 gms.
Metal samples	- 744 gms.

The oxide samples were necessary in the standardization of laboratory chemical reagents utilized in our analytical procedures. They were received upon request from the National Bureau of Standards, Washington, D.C. Since we have mutual interest in reducing the storage of S & F materials at this plant to a minimum, your instructions are requested on the procedures to be taken towards the disposition of this material.

Very truly yours,

THE LINDBE AIR PRODUCTS COMPANY
CERAMICS PLANT
