List of California Sites

Hattie Carwell, SAN/NSQA Division

Attached for your information is the list of California sites we identified in our search of Manhattan Engineer District records for the Formerly Utilized Sites Remedial Action Program (FUSRAP). None of the facilities listed qualified for "FUSRAP." The only site in California that was included in FUSRAP was Gilman Hall on the University of California-Berkeley Campus.

All California sites that are in our Surplus Facilities Management Program are under San Francisco Operations and are at the Santa Susana Field Laboratory or the University of California-Davis.

If you have questions on any of the sites on the list, please call me at FTS 233-5439.
