Shannon Luminous Materials Co.
7356 Santa Monica Boulevard
Hollywood 46, Calif.

MATERIALS 4

Att: Mr. J. R. Alburger

Gentlemen:

We have your letter dated October 6, 1952 which is sufficient to give us a better picture of the use which you propose to make of uranium compounds in luminous paint pigments.

We are attaching license number C-2663 which permits you to purchase three pounds of uranium compounds for development work.

We want you to understand in advance, however, that we will be reluctant to issue additional licenses for production of luminous paints except for pigments to be used exclusively in products having military or clearly defined industrial utility.

Very truly yours,

Lawrence C. Burman
Director, Licensing Division

Enclosures:
License No. C-2663

OCTOBER 10 1952
