US Department of Energy (DOE) Legal, B779 Decommissioning Operations Plan (DOP) review comment sheet, October 1997.	
<a href="https://lmpublicsearch.lm.doe.gov/SiteDocs/B779-A-000007.pdf">https://lmpublicsearch.lm.doe.gov/SiteDocs/B779-A-000007.pdf</a>	443 KB
<b>B779-A-000008</b>	4/30/1997
Facility Disposition Working Group note submits April 1997 DOP draft	
Facility Disposition Working Group note submits the April 1997 draft of the Decommissioning Operations Plan (DOP) for the Building 779 Cluster. Subsequent B779 DOP comments are attached.	
<a href="https://lmpublicsearch.lm.doe.gov/SiteDocs/B779-A-000008.pdf">https://lmpublicsearch.lm.doe.gov/SiteDocs/B779-A-000008.pdf</a>	12 MB
<b>B779-A-000009</b>	1/6/1997
Draft DOP for the Building 779 Complex, January 6, 1997	
Draft Decommissioning Operations Plan (DOP) for the Building 779 Cluster, January 6, 1997 - This document provides the administrative structure within which the decommissioning activities will be conducted. Section 1 provides an introduction to the governing documents for decommissioning at RFETS and a summary of B 779 history, facility layout, and operations. Section 2 identifies the organizational structure, responsibilities and lines of communication, which will be used to complete the 779 Cluster decommissioning activities. Section 3 presents a description of the areas to be decommissioned and planned decontamination/decommissioning activities. Section 4, briefly describes the facility characterization process and the identified hazards within the 779 Cluster. Section 5 establishes the criteria which will be used to demonstrate the criteria which will be used to demonstrate the 779 cluster buildings have been adequately decontaminated and they are ready to be dismantled. Section 6 is a discussion of how the nuclear safety operational controls will be reduced during the decommissioning process as the hazards within the 779 cluster are reduced. Section 7 identifies the documents and controls that will be used, in conjunction with the work packages to ensure worker health and safety during decommissioning operations. Section 8 introduces the types and volumes of wastes that the project expects to generate, and how the waste will be managed when it is generated. Section 9 describes the CERCLA process that governs the project controls and execution. Section 10 establishes the quality controls and management attributes that will be implemented during the decommissioning process. Section 11 provides an overview of the security requirements for the 779 Cluster. Review comments to date are either resolved or incorporated.

<b>B779-A-000011</b>	1/20/1997
Submits the Building 779 Cluster DOP to SSOC	
Submits the attached [000016] Decommissioning Operations Plan (DOP) for the Building 779 Cluster to Safe Sites of Colorado, L.L.C. (SSOC) for comment.	
<a href="https://lmpublicsearch.lm.doe.gov/SiteDocs/B779-A-000011.PDF">https://lmpublicsearch.lm.doe.gov/SiteDocs/B779-A-000011.PDF</a>	67 KB
<b>B779-A-000012</b>	9/14/1994
D&D Pilot Project No. 7: Building 779, Rooms 152 and 154, Draft A	
Submits the enclosed Task-Specific Health and Safety Plan (HASP) Environmental Restoration Programs Division Phase I, Decontamination and Decommissioning (D&D) Pilot Project No. 7, Rocky Flats Environmental Technology Site (RFETS) Building 779, rooms 152 and 154, Draft A, September 1994; HASP completes milestone No. 130020433	
<a href="https://lmpublicsearch.lm.doe.gov/SiteDocs/B779-A-000012.PDF">https://lmpublicsearch.lm.doe.gov/SiteDocs/B779-A-000012.PDF</a>	1 MB
<b>B779-A-000013</b>	1/13/1998
Milestone change for the start of Building 779 Strip-out, March 1, 1998	
Regards Milestone change for the start of Building 779 Strip-out, March 1, 1998 date change will allow sufficient time for review and response to comments on the Decommissioning Operations Plan (DOP), and allow for time needed for the Colorado Department of Public Health and Environment (CDPHE) to complete approval of the document.	
<a href="https://lmpublicsearch.lm.doe.gov/SiteDocs/B779-A-000013.PDF">https://lmpublicsearch.lm.doe.gov/SiteDocs/B779-A-000013.PDF</a>	114 KB
<b>B779-A-000014</b>	2/3/1998
Final DOP for the B779 Cluster	
Submits the attached [000016] Final Decommissioning Operations Plan (DOP) for the Building 779 Cluster to be forwarded to the US Department of Energy, Rocky Flats Field Office (DOE/RFFO) and the Colorado Department of Public Health and Environment (CDPHE); responses to public comments have been included as Appendix D.	
<a href="https://lmpublicsearch.lm.doe.gov/SiteDocs/B779-A-000014.PDF">https://lmpublicsearch.lm.doe.gov/SiteDocs/B779-A-000014.PDF</a>	80 KB
<b>B779-A-000015</b>	1/30/1998
Proceed with training on Gloveboxes 866 and 867, B779, room 160	
Documents a January 30, 1998 discussion and US Department of Energy (DOE) approval for Building 779 Closure Project to proceed with training on Gloveboxes 866 and 867, B779, room 160. Gloveboxes 866 and 867 have been identified as training gloveboxes designated for removal prior to approval of the 779 Cluster Decommissioning Operations Plan (DOP). Radiological survey results verify that these gloveboxes are not radiologically contaminated.

DOP for the Building 779 Cluster IM/IRA, February 1998	
Decommissioning Operations Plan (DOP) for the Building 779 Cluster Interim Measure / Interim Remedial Action (IM/IRA), February 1998.	
<a href="https://lmpublicsearch.lm.doe.gov/SiteDocs/B779-A-000016.PDF">https://lmpublicsearch.lm.doe.gov/SiteDocs/B779-A-000016.PDF</a>	15 MB

<b>B779-A-000017</b>	12/17/1997
RLCP for the 779 Cluster Project, December 17, 1997	
Reconnaissance Level Characterization Plan (RLCP) for the 779 Cluster Project, December 17, 1997. Due to the change in mission of the Rocky Flats Environmental Technology Site (RFETS/Site) from the production of nuclear components to environmental cleanup and shutdown, Building 779 and its associated facilities have no identified mission after Fiscal Year 1996. The 779 Cluster is being decommissioned to reduce operating costs and to eliminate hazards within the Cluster's building. The purpose of this characterization plan is to outline the sampling requirements and methodology for characterization the 779 Cluster. The overall characterization effort identifies the type, quantity, condition and location of radioactive and hazardous materials which are, or which me be, present as residual contamination in the subject facilities. The compilation of facility information contained herein, in conjunction with the 779 Cluster Project Files established during this investigation, brings together pertinent data from various sources to serve as a practical reference for project use during the decontamination and decommissioning efforts.

DOP for the B779 IM/IRA, September 1997	
Decommissioning Operations Plan (DOP) for the Building 779 Interim Measure / Interim Remedial Action (IM/IRA), September 1997 - The purpose of this document is to meet the intent and requirements of both a DOP and an IM/IRA in accordance with the Rocky Flats Cleanup Agreement (RFCA, 1996). The Proposed Action in this document is to decommission the 779 Cluster Facilities by removing the interior equipment, decontaminating the remaining structures, and dismantling the facilities.

This modification to the DOP has been generated with input from members of Colorado Department of Public Health and Environment (CDPHE) Hazardous Waste Management Division (HZMD) and US Environmental Protection Agency (EPA) staff. Includes B779 Cluster Demolition Project Air Monitoring Plan, March 1999.	
<a href="https://lmpublicsearch.lm.doe.gov/SiteDocs/B779-A-000085.PDF">https://lmpublicsearch.lm.doe.gov/SiteDocs/B779-A-000085.PDF</a>	1 MB

<b>B779-A-000086</b>	5/18/1999
Requests B779 DOP Field Modification; Includes DOE conditional agreement	
Provides request for Building 779 Decommissioning Operations Plan (DOP) Field Modification, May 18, 1999 - B779 will discharge an estimated total of 510 gallons of aqueous hazardous waste to the B779 process waste system during a time frame beginning May 24, 1999 and ending July 24, 1999. Beginning with the first discharge, B779 will conduct biweekly inspections of the portions of the system used and will continue with these inspections until closure is complete. After the discharge of the hazardous waste is complete, the system will be flushed with copious amounts of non-hazardous water and a sample will be taken at a point in the system outside of the 779 Project boundaries. The sample will be analyzed only for the containment of concern and if results are below regulatory limits, the process waste system will be closed as a regulated unit. US Department of Energy, Rocky Flats Field Office (DOE/RFFO) agrees with the plan, with the exception of the inspection frequency. Daily inspections are required when the system is actively being used to store and/or transport hazardous waste.

<b>B779-A-000092</b>	11/13/1998
Constitutes approval of Modification to the B779 Cluster November 1998 DOP	
The Colorado Department of Public Health and Environment (CDPHE) Hazardous Waste Management Division (HZMD), received US Department of Energy (DOE) correspondence transmitting the draft demolition plan for Building 729 in the 779 Cluster, October 20, 1998. The Division reviewed and commented on the plan, resulting in a revised plan dated November 1998. With the revisions to the plan and the finalization of the air monitoring plan, the Department fines the plan to be acceptable. This letter constitutes approval of the "Modification to the Building 779 (B779) Cluster Decommissioning Operations Plan (DOP) for Demolition of B729," dated November 1998.

<b>B779-A-000094</b>	5/18/1999
Provides request for Approval for B779 DOP Field Modification	
Provides Request for Approval for Building 779 Decommissioning Operations Plan (DOP) Field Modification, May 18, 1999 - B 779 will discharge an estimated total of 510 gallons of aqueous hazardous waste to the B779 process waste system during a time frame beginning May 24, 1999 and ending July 24, 1999. Beginning with the first discharge, B779 will conduct biweekly inspections of the portions of the system used and will continue with these inspections until closure is complete. After the discharge of the hazardous waste is complete, the system will be flushed with copious amounts of non-hazardous water and a sample will be taken at a point in the system outside of the 779 Project boundaries. The sample will be analyzed only for the containment of concern and if results are below regulatory limits, the process waste system will be closed as a regulated unit.

<b>B779-A-000099</b>	9/1/1999
Draft CRSR for Building 779, Administration Building (Admin Area)	
Draft Closeout Radiological Survey Report (CRSR) for Building 779, Administration Building dated September 1999, Revision 0. Total and removable surface contamination surveys, paint/surface media samples (survey units 77909 and 77920 only), and scan surveys were performed in each Administration Building survey unit. The number/frequency of surveys/samples collected in each survey unit was based on the guidance provided in the Multi-Agency Radiation Survey and Site Investigation Manual (MARSSIM). All survey/sample results presented in this report meet the Derived Concentration Guideline Levels (DCGLs) as defined by the Closeout Radiological Survey Plan (CRSP) for the 779 Cluster. However, the building will nor be suitable for unrestricted release until the completion of the roof and roof containment surveys, the survey of the elevator (77918), the survey of the Exhaust Dust Tower interior (77920), the removal of miscellaneous systems and equipment (e.g. conduit, fire protection systems, etc.), and the approval of the associated Property Release Evaluations (PREs). This report documents the final survey results of the Administration Building portion of 779 (including the Administration building exterior). The final surveys for other portions of B779 and the B779 Cluster will be documented in separate stand-alone reports.

B779 Cluster Closure Project, Non-Radiological Closeout Plan	
Building 779 Cluster Closure Project, Non-Radiological Closeout Plan, September 27, 1999. The purpose of this plan is to ensure that sufficient characterization and remediation (as necessary) has occurred, in accordance with Decommissioning Operations Plan (DOP) for the 779 Cluster Interim Measure / Interim Remedial Action (IM/IRA) and Reconnaissance Level Characterization Report (RLCR) for non-radiological contaminants to allow demolition of the 779 Cluster. Prior to demolition of an area, the requirements of this plan will be evoked. By completing the steps identified in this plan, Rocky Flats Environmental Technology Site (RFETS) will ensure that all contaminants of Concern have been removed, or remediated to a level below regulated levels.

Request for review of Phase I HASP for D&D Pilot Project No. 7, Draft A	
Interoffice correspondence: EG&G Rocky Flats, Inc. submittal of the Task-Specific Health and Safety Plan (HASP) Environmental Restoration (ER) Programs Division, Phase I, Decontamination and Decommissioning (D&D) Pilot Project No. 7, Rocky Flats Environmental Technology Site (RFETS), Building 779, Rooms 152 and 154. Revision 0, Draft A, September 2, 1994. The purpose of this task-specific HASP is to identify personal protection standards and mandatory safety practices and procedures for personnel involved in the Decontamination and Decommissioning (D&D) project. This HASP is based on requirements for health and safety plan content established by the Occupational Safety and Health Administration (OSHA) in Title 29 Code of Federal Regulations (CFR) 1910.120. This HASP is also based on requirements from the Health and Safety Practices Manual, the 5400 series of Department of Energy Orders, and 10 CFR 835. It is requested that the review process for this document is initiated. Further requested that comments be returned by September 25, 1994.

TRU Mixed Categorization Evaluation Unit 90.43 (GB 860) Closure	
Safe Sites of Colorado, L.L.C. (SSOC) and Rocky Mountain Remediation Services (RMRS) 779 Closure Project submits Transuranic Mixed (TRM) Waste categorization evaluation. The Building 779 Decommissioning Operations Plan (DOP) Section 9.1.2 states: For those gloveboxes that do not meet the Low-Level Mixed (LLM) Waste categorization, an evaluation must be conducted to determine the feasibility and benefits of reducing the Plutonium (Pu) content by strip coating or other decontamination methods. An answer "yes" to each of the following questions is required for a waste stream to be eligible for decontamination.

<b>B779-A-000211</b>	10/20/1998
DOE proposes minor mod to B779 DOP regarding demolition of B729	
US Department of Energy, Rocky Flats Field Office (DOE/RFFO) forwards a proposed modification to the Decommissioning Operations Plan (DOP) for Building 779. This modification addresses plans for the demolition of B729. The modification includes discussions on the state of the building prior to demolition, environmental monitoring, work controls, and so forth. It is proposed to decontaminate B729 prior to demolition such that it meets the free release limits specified in the 779 DOP, and to dispose of demolition waste off-site.	
<a href="https://lmpublicsearch.lm.doe.gov/SiteDocs/B779-A-000211.PDF">https://lmpublicsearch.lm.doe.gov/SiteDocs/B779-A-000211.PDF</a>	117 KB
<b>B779-A-000212</b>	6/23/1999
DOE proposes minor mod to B779 DOP	
Forwards the attached [000205] Modification for Building 779 Decommissioning Operations Plan (DOP), dated February 6, 1998, it is stated that demolition plans must be submitted for Division approval and public comment prior to execution. Because the original DOP lacked sufficient detail on the demolition of the facility, US Department of Energy, Rocky Flats Field Office (DOE/RFFO) is submitting this modification to the DOP for final review concurrent with a 30-day Public Comment Period. This modification has been generated with input from members of HZMD staff and the US Environmental Protection Agency (EPA).	
<a href="https://lmpublicsearch.lm.doe.gov/SiteDocs/B779-A-000212.PDF">https://lmpublicsearch.lm.doe.gov/SiteDocs/B779-A-000212.PDF</a>	104 KB

<b>B779-A-000215</b>	1/26/2001
Discussion of D&D of B779 and comments DOE	
Colorado Department of Public Health and Environment (CDPHE) letter discussing the Building 779 Closeout Report, Revision 0 dated April 2000, which is found acceptable. The CDPHE commends the US Department of Energy (DOE) for making the project so successful. This was the first decommissioning of a significantly contaminated Plutonium (Pu) weapons production building to have ever occurred anywhere. The experience and knowledge for 779 has paved the way for success in decommissioning other Pu buildings at Rocky Flats Environmental Technology Site (RFETS).

Transmits the DPP for approval prior to work in B779	
Rocky Mountain Remediation Services, L.L.C. (RMRS) transmits the Decommissioning Program Plan (DPP) for review and approval prior to executing field decommissioning work in Building 779. The objectives of the DDP are as follows; to reduce hazards associated with facilities and prepare them for reuse, dismantlement, or demolition by removing unacceptable levels of radioactive material and chemicals, de-energizing electrical equipment, draining systems, and removing classified tooling.

<b>B779-A-000220</b>	4/13/2000
Purpose of Contact: Notification of placement of RCRA regulated waste in a non-regulated storage area	
During a review of the Waste Environmental Management System (WEMS), it was determined that a hazardous waste container (IP2) containing circuit boards had been moved to the 779 Pad. The container was moved to the Pad on April 11. The 779 Pad is not a Resource Conservation and Recovery Act (RCRA) regulated unit. Two additional IP2 containers of lead (D008) were also taken out to the Pad. Corrective actions were undertaken. The area where the IP2 containers were being stored on the 779 Pad was in full compliance with RCRA requirements by April 12.

Approves the enclosed B779 Cluster DOP IM/IRA major mod	
Approves the enclosed Major Modifications of the Decommissioning Operations Plan (DOP) for the Building 779 Cluster Interim Measures / Interim Remedial Action (IM/IRA), August 25, 1999 - The purpose of this memorandum is to transmit the Building 729 Demolition Plan as a major modification to the B779 DOP for the B779 Cluster. The final B729 Demolition Plan was submitted and approved by the State, but was not formally transmitted as an addendum to the B779 DOP. This letter completes that action The B729 Demolition Plan will be listed as Addendum II to the B779 DOP. The final approved plan, approval letter, and revised Table of Contents (TOC) are included with this transmittal.

<b>B779-A-000225</b>	1/26/2004
RE: Permission to backfill excavations 700-7 Remediation Project	
Purpose of Contact: The cooling tower slabs (784, 785, and 786) and the cooling tower pump-house (783), all northeast of the 779 slab have been removed along with associated utilities and foundation structures to a depth of 4 feet below final grade. It is understood that the Project has concurrence from the State to proceed with backfill of the associated excavations. The project understands the following conditions for the backfill: The remainder of the pipes that fed the cooling towers will need to be sealed closed by foaming; and Analytical results of water samples taken from the tanks at 783 may indicate the need for further remediation at 783.

779 DOP modification approval	
The Colorado Department of Public Health and Environment has received US Department of Energy, Rocky Flats Field Office (DOE/RFFO) letter of March 10, 2000, requesting a minor modification of the Building 779 Decommissioning Operations Plan (DOP) relating to certain information and changes to work plans for below ground sumps and pits in the 779 cluster. CDPHE has reviewed the modification and discussed the related issues between member of staff. This letter constitutes approval of the modification pursuant to Paragraph 127 of RFCAs. Specific monitoring and assessments of concerns regarding the sump in 779, 782, and 783 will be performed as agreed upon in a meeting between CDPHE, EPA, and site personnel on March 7, 2000.
