Mound Site Plume Treatment Project, October 1998 through December 1998, December 29, 1998	
Transmits the enclosed Quarterly Report for the Mound Site Plume Treatment Project, October 1998 through December 1998, December 29, 1998 - The Mound Site Plume Treatment Project (MSPTP) collects and treats the contaminated groundwater plume derived forthe Mound Site to the groundwater Action Level Framework (ALF) Tier II level concentrations defined in the Rocky Flats Cleanup Agreement (RFCA) (US Department of Energy (DOE), 1996), and demonstrates the feasibility of using this system on other contaminated groundwater plumes. The project has had no safety issues. The repairs identified during the startup and shakedown period have been completed. The lessons learned from the installation and startup of the MSPTP were incorporated into both the EastTrenches project and the Solar Pond Plume (SPP) project.
