The CDH approves OU09 EE TM. EE will act as model for other IA OUs.	
The Colorado Department of Health (CDH) approves the Operable Unit OU09: Original Process Waste Lines (OPWL) Environmental Evaluation (EE) Technical Memorandum (TM). Not all of the OUs in the industrialized portion of the Rocky Flats Plant (RFP) are scheduled for a two-phase Resource Conservation Recovery Act (RCRA) Facilities Investigation / Remedial Investigation (RFI/RI). Therefore, since this EE will act as a model for the other IA OUs, and since this EE is currently structured in a two-phase investigation format, it will be up to the US Department of Energy, Rocky Flats Office (DOE/RFO) to initiate planning that can complete an entire EE for a one-phase RFI/RI OU.

Risk Assessment Study: On February 10, 1987, a meeting was held by US Department of Energy (DOE) Rocky Flats (RF) / Rockwell International (RI) personnel to discuss a recent US Environmental Protection Agency (EPA) meeting (February 2, 1987) and several land litigation related issues. The main focus of this meeting was a recent letter from the City of Broomfield to EPA, Region VIII regarding their reservoir expansion. Basically, EPA will inform Broomfield that their concerns regarding Plutonium (Pu)soil contamination have been reviewed by EPA and are not considered problem areas at this time. However, EPA will honor Broomfield's request that the Agency for Toxic Substances and Disease Registry (ATSDR) be brought in for a health assessment of Great Western Reservoir expansion options. Final Report delivery of study results of Dam Toe Slope Sand/Rock Blanket Installation effects on the Preble's Meadow Jumping Mouse.	
Interoffice correspondence: Rocky Mountain Remediation Services (RMRS) provides the Final Report on the Study Results of the Dam Toe Slope Sand / Rock Blanket Installation Effects on the Preble's Meadow Jumping Mouse, January 29, 1996. All US Department of Energy (DOE) comments including those comments from the Environmental Liaison Group and DOE Legal Department have been resolved in this report. This study evaluated potential impacts by trapping (i.e., capturing and releasing) small mammals to determine the presence or absence of the Preble's Meadow Jumping Mouse, marking captured mice with fluorescent powder attempting to locate their burrows, and monitoring noise levels generated by equipment during construction. US Department of Energy, Rocky Flats Field Office (DOE/RFFO) worked in conjunction with US Fish and Wildlife Service (FWS), Denver Field Office (DFO) to create the Dam Toe Slope Sand/Rock Blanket Study Field Sampling Plan (Plan) (EG&G Rocky Flats, Inc., April 1994) which was designed to assess potential impacts to Preble's Meadow Jumping Mouse ( <i>Zapus hudsonius preble</i> ) (mouse) populations. {Operable Unit OU03: Off-Site Areas}
