EG&G proposes to delete Environmental Evaluation (EE) in the production areas	
EG&G Rocky Flats, Inc. proposes to delete Environmental Evaluations (EE) for Operable Units (OUs) that are located at least partly within the Production Area [Industrial Area (IA)] (OU04, OU08, OU09, OU10, OU12, OU13, OU14, OU15, and OU16), and to treat this entire area as a "Source Term" for contaminants entering adjacent OUs. Most of these areas are paved and any vegetation present is either landscaping plants or weeds. The EEs for these are inappropriate.

Draft Final NFA Justification Document, OU16, March 1992, Volume I.	
Draft Final No Further Action (NFA) Justification Document, Rocky Flats Plant (RFP), Operable Unit OU16: Low Priority Sites, March 1992, Volume I. This document presents historical information relating to releases in OU16. The Individual Hazardous Substance Sites (IHSS) located in OU16 were identified as potential Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) sites under the Phase I Comprehensive Environmental Assessment and Response Program (CEARP). The goal of this document is to utilize all existing documentation to determine if no further action is warranted.

Final No Further Action (NFA) Justification Document for OU16, October 1992	
Final No Further Action (NFA) Justification Document for Rocky Flats Plant (RFP) Operable Unit OU16: Low Priority Sites; October 1992. This document presents historical information and available data pertaining to the types and extent of contamination/releases and remedial response actions at OU16. Unlike other OUs at RFP where Individual Hazardous Substance Sites (IHSS) were grouped together in the Interagency Agreement (IAG) on the basis of similar contaminants, release types, and/or location, the IHSSs comprising OU16 were grouped together because of the likelihood that previous remediation efforts and/or natural environmental processes at these low-priority sites eliminated the need for any further remedial response action.

Response to CDH: EG&G has reviewed modifications to IAG re transfers of IHSSs	
Response to the attached () May 27, 1993 Colorado Department of Health (CDH) letter. EG&G Rocky Flats, Inc. has reviewed the modifications to the Interagency Agreement (IAG) regarding transfers of Individual Hazardous Substance Site (IHSS) 167.2 and IHSS 167.3 from Operable Unit OU06 to OU07; IHSS 196 from OU16 to OU05; and IHSS 197 from OU16 to OU13. Analysis of this action indicates that no impacts have occurred to scope or schedule for the following reasons: {1} IHSS 167.2 and 167.3 were moved into the OU07 boundaries via the quarterly update of the Historical Release Report (HRR). The new locations correspond to areas already sampled by OU07 staff of the potential contaminants of concern; {2} IHSS 196 lies within the boundaries of IHSS 115, which is already being assessed by the OU05 investigation; and {3} IHSS 197 was previously transferred, via the Agency review, into the OU13 Work Plan (WP) and has been budgeted.

PP and Draft Modification of CHWA Permit, OU16, October19, 1993	
Proposed Plan (PP) and Draft Modification of the Colorado Hazardous Waste Act (CHWA) Permit for Rocky Flats Plant, Operable Unit OU16: Low Priority Sites, October 19, 1993. Summary of Remedial Alternative: The decision for a "No Action" alternative for Individual Hazardous Substance Sites IHSS 185, 192, 193, 194, and 195 of OU16 was based upon the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), which provides for the selection of a No Action alternative when a site or OU is already in a protective state. The Risk Assessment analysis performed in the Final No Further Action (NFA) Justification Document determined that these IHSSs are currently in a protective state and present no risk to human health and the environment. Further investigation is warranted for IHSSs 196 and 197 to be conducted under the scopes of OU05 and OU13, respectively.

Provides EPA comments Final NFA Justification Document, OU16: Low Priority Sites	
US Environmental Protection Agency (EPA) comments on the Final No Further Action (NFA) Justification Document for Operable Unit OU16: Low Priority Sites. Overall, this document is considerably improved from the draft version. EPA agrees that no further action is needed for Individual Hazardous Substance Sites (IHSS) 185, 192, 193, and 194. However, EPA believes that IHSSs 195, 196, and 197 will need further investigation.

Draft: CAD/ROD, OU16: Low Priority Sites, August 1994 (Unsigned)	
Draft: Corrective Action Decision / Record of Decision (CAD/ROD), Operable Unit OU16: Low Priority Sites, August 1994 (Unsigned). A remedy of "No Action" was selected for the Rocky Flats Environmental Technology Site (RFETS) OU16 Individual Hazardous Substance Sites (IHSS) 185, 192, 193, 194, and 195. The risks associated with these IHSSs were assessed using conceptual model analyses, which demonstrated that exposure pathways were not completed for IHSSs 185, 192, 193, 194, and 195 because past response actions and/or natural attenuation processes eliminated the source or exposure pathways. Therefore, these IHSSs present no unacceptable risk to human health and the environment. Further investigation has been recommended for IHSS 196 as part of OU05 and for IHSS 197 as part of OU13.

Response: EM Surveillance Report, ROD Process for OU16: Low Priority Sites	
Interoffice response to June 28, 1994 Quality Assurance Surveillance Report for Operable Unit OU16. The "Background Geochemical Report for Rocky Flats Plan" reference regarding Tritium activities within the O16 No Further Action (NFA) Justification Document is supported by current surface water sampling data. The overall conclusion of the NFAJD and the "No Action" Record of Decision (ROD) regarding Individual Hazardous Substance Site IHSS 194 is based primarily on this information, not a statistical comparison to background Tritium activities.

EM Surveillance Report, ROD Process for OU16: Low Priority Sites	
Environmental Management Surveillance Report, Record of Decision (ROD) Process for Operable Unit OU16: Low Priority Sites. The surveillance will determine if any quality controls are missing from the ROD process for OU16. Since the "No Action" decision was specifically referenced in the Interagency Agreement (IAG), no field work was conducted in support of OU16. However, a conceptual model was developed and presented within the No Further Action (NFA) Justification Document to support the conclusion that so sources and/or pathways for contamination exist. One of the conclusions reached for the NFAJD in Individual Hazardous Substance Site (IHSS) 194 was that Tritium levels in the steam condensate leak did not statistically differ from background. Tritium data used in support of the draft ROD should be qualified accordingly. Surveillance dates: June 13 through 17, 1994

CAD/ROD for OU16, Low Priority Sites, August 1994 (Unsigned)	
Corrective Action Decision / Record of Decision (CAD/ROD) for Operable Unit OU16, Low Priority Sites, August 1994 (Unsigned). A remedy of "No Action" was selected for the Rocky Flats Environmental Technology Site (RFETS) Operable Unit OU16: Low Priority Sites Individual Hazardous Substance Sites (IHSS) 185, 192, 193, 194, and 195. The risks associated with the IHSSs were assessed using conceptual model analyses, which demonstrated that exposure pathways were not completed for IHSSs 185, 192, 193, 194, and 195 because past response actions and/or natural attenuation processes eliminated the source or exposure pathways. Therefore, these IHSSs present no unacceptable risk to human health and the environment.
