Responses to comments on Building 123 Closure Plan	
Submitted for review, Responses to comments on Building 123 Closure Plan.	
<a href="https://lmpublicsearch.lm.doe.gov/SiteDocs/B123-A-000015.PDF">https://lmpublicsearch.lm.doe.gov/SiteDocs/B123-A-000015.PDF</a>	468 KB

<b>B123-A-000016</b>	8/1/1997
B123 Soil SAP, IHSS 121 and 148	
Soil Sampling and Analysis Plan (SAP) to Characterize Individual Hazardous Substance Sites IHSS 121 and 148 at Building 123, July 23, 1997.	
<a href="https://lmpublicsearch.lm.doe.gov/SiteDocs/B123-A-000016.PDF">https://lmpublicsearch.lm.doe.gov/SiteDocs/B123-A-000016.PDF</a>	653 KB
<b>B123-A-000017</b>	8/21/1997
PAM for the Decommissioning of Building 123, August 21, 1997	
Proposed Action Memorandum (PAM) for the Decommissioning of Building 123; August 21, 1997 Revision 4; outlines the approach and Applicable or Relevant and Appropriate Requirements (ARARs) to be utilized in decommissioning Buildings 123, 114, 113, 123s. Remediation of Individual Hazardous Substance Site IHSS 121 and 148; partial closing Resource Conservation Recovery Act (RCRA) Unit 40; and decontamination of radiologically contaminated facility systems.	
<a href="https://lmpublicsearch.lm.doe.gov/SiteDocs/B123-A-000017.PDF">https://lmpublicsearch.lm.doe.gov/SiteDocs/B123-A-000017.PDF</a>	8 MB
<b>B123-A-000018</b>	10/2/1997
SAP to Characterize IHSS 121 and 148 at Building 123	
Letter forwards Soil Sampling and Analysis Plan (SAP) to Characterize Individual Hazardous Substance Sites IHSS 121 and 148 at Building 123; and Closure Plan for B123 Components of Resource Conservation Recovery Act (RCRA) Unit 40. Each document requires approval from the Colorado Department of Public Health and Environment (CDPHE) before execution, Revision 3.	
<a href="https://lmpublicsearch.lm.doe.gov/SiteDocs/B123-A-000018.PDF">https://lmpublicsearch.lm.doe.gov/SiteDocs/B123-A-000018.PDF</a>	3 MB
<b>B123-A-000019</b>	8/19/1997
Decommissioning of Building 123 - A closure plan for partial closure	
Letter forwarding Proposed Action Memorandum (PAM) for the Decommissioning of Building 123 - A Closure Plan for partial closure of Resource Conservation and Recovery Act (RCRA) Unit 40 is being developed separately for this PAM and will be forwarded under separate cover; attached is a response to Colorado Department of Public Health and Environment (CDPHE) comments; the City of Westminster comments were received on July 20, 1997, well after the close of the Public Comment Period. Building 123 include both Operable Unit OU09, Individual Hazardous Substance Site IHSS 121 and OU13, IHSS 148, Revision 3 August 7, 1997.	
<a href="https://lmpublicsearch.lm.doe.gov/SiteDocs/B123-A-000019.PDF">https://lmpublicsearch.lm.doe.gov/SiteDocs/B123-A-000019.PDF</a>	3 MB
<b>B123-A-000020</b>	8/7/1997
Checklist decom of B123, Ductwork Wash Down Dismantlement Guidelines	
Building 123 Proposed Action Memorandum (PAM) response to Department of Energy (DOE) and Colorado Department of Public Health and Environment (CDPHE) and the US Environmental Protection Agency (EPA) comments, enclosed environmental checklist decommissioning of Building 123. Also enclosed Ductwork Wash down Dismantlement Guidelines B123 Perchloric acid hoods.	
<a href="https://lmpublicsearch.lm.doe.gov/SiteDocs/B123-A-000020.PDF">https://lmpublicsearch.lm.doe.gov/SiteDocs/B123-A-000020.PDF</a>	2 MB

<b>B123-A-000021</b>	6/2/1997
PAM for decommissioning Building 123, May 21, 1997.	
Letter forwarding enclosed Proposed Action Memorandum (PAM) for Decommissioning Building 123, May 21, 1997 Revision 1.	
<a href="https://lmpublicsearch.lm.doe.gov/SiteDocs/B123-A-000021.PDF">https://lmpublicsearch.lm.doe.gov/SiteDocs/B123-A-000021.PDF</a>	2 MB

Building 123 Asbestos Characterization Report	
Asbestos Characterization Report, Addendum to Building 123 Inspection, June 6, 1997 Revision 1. Appendices A through E consist of Inspectors Certifications, Bulk Asbestos Sample Data Table, Drawing and Photographs and Laboratory Data.	
<a href="https://lmpublicsearch.lm.doe.gov/SiteDocs/Revised B123-A-000024.PDF">https://lmpublicsearch.lm.doe.gov/SiteDocs/Revised B123-A-000024.PDF</a>	10 MB
<b>B123-A-000025</b>	7/29/1997
Draft RLCP for B123	
Draft Reconnaissance Level Characterization Plan (RLCP) for Building 123, Revision 0 July 29, 1997. See CERCLA Administrative Record (AR) B123-A-000043 pages 7, 8 and 9.	
<a href="https://lmpublicsearch.lm.doe.gov/SiteDocs/B123-A-000025.PDF">https://lmpublicsearch.lm.doe.gov/SiteDocs/B123-A-000025.PDF</a>	2 MB
<b>B123-A-000026</b>	8/13/1997
RLCR for Building 123, August 1997	
Reconnaissance Level Characterization Report for Building 123, Revision 0 August 13, 1997. The purpose of this RLCR is to present a summary of the available historical data and process information relating to the B123 Cluster. This project will facilitate the decommissioning of Building 123, 113, 114, and 123S; remediation of Individual Hazardous Substance Sites IHSS 121 and 148; partial closure of Resource Conservation and Recovery Act (RCRA) Unit 40; and decontamination of radiologically-contaminated facility systems. The 123 slab and foundation will be removed as required to remediate and subsurface contamination as dictated by soil sampling results.

<b>B123-A-000168</b>	2/14/2002
Re using soil excavated from Utility Disconnects at 123 as backfill	
Purpose of Contact: Regarding a discussion with Colorado Department of Public Health and Environment (CDPHE) to determine if soil excavated near the perimeter of the Building 123 foundation footer (approximately 30 cubic yards) is suitable for backfill at the B123 Site. Based on a review of data summarized in the Industrial Area Sampling and Analysis Plan (IASAP) Fiscal Year 2002 Addendum Number IA-02-01, CDPHE concurred there is sufficient data to show that the utility soil excavated near the foundation does not contain contamination and is suitable for use as backfill at the 123 Site.	
<a href="https://lmpublicsearch.lm.doe.gov/SiteDocs/B123-A-000168.PDF">https://lmpublicsearch.lm.doe.gov/SiteDocs/B123-A-000168.PDF</a>	63 KB
<b>B123-A-000169</b>	2/11/2002
Re use of on-site soil and gravel as backfill at the B123 site	
Purpose of Contact: Regarding a discussion with Colorado Department of Public Health and Environment (CDPHE) and the use of soil excavated adjacent to the Building 123 west foundation footer wall as backfill material. Based on a review of data summarized in the Industrial Area Sampling and Analysis Plan (IASAP) Fiscal Year 2002 Addendum Number IA-02-01, there is no known contamination associated with the building and subsurface soil in this area. CDPHE stated that there should be no problem with this plan if the gravel is turned into the soil and covered for proper site grade and runoff.

Building 123 Demolition Plan approval	
The Colorado Department of Public Health and Environment (CDPHE) Hazardous Waste Management Division (HZMD) has reviewed the Demolition Plan for Building 123 Demolition Project submitted by the Rocky Flats Environmental Technology Site (RFETS/Site) on February 17, 1998. The Closeout Radiological Survey Plan for the 123 Cluster has been provided to the Division. Currently, final surveys have been completed for the east-wing of 123, 114 and 123S. Based on review of the information provided, all remaining materials and structures within these buildings have met the unrestricted release standards, with the exception of the concrete slab. The Division hereby approves the Demolition Plan for 123 Project.

Discussion of underground piping remaining at the 123 Slab	
<p>Purpose of Contact: A discussion was held with Colorado Department of Public Health and Environment (CDPHE) clarifying activities that were conducted under the Closure Plan for Building 123, Components of RCRA Unit 40, Revision 0, November 12, 1997, and reported in the Certification of Closure for the Building 123 Components of RCRA Unit 40, revision 0, May 1998. In the May 1998 document it stated that the underground piping from Building 123, Room 158, was decontaminated in accordance with the Closure Plan. The final rinsate was sampled for priority pollutants and heavy metals, with all analytes below the Tier II Action Levels required to meet clean closure, except for lead and chromium. The levels of lead and chromium in the final rinsate of the piping were 21.7 ppb and 588 ppb respectively, which are well below regulatory levels. CDPHE agreed that if the piping is being removed it is not considered hazardous waste for disposal purposes, if the Site had performed appropriate decontamination activities. Additionally, it was discussed that although the May 1998 document attached the F001, F002, and F005 EPA codes to the piping, because the rinsate showed non-detects for any of these potential analytes these codes should not apply to the piping being removed for disposal. CDPHE also agreed with this conclusion, based on the Site conducting the appropriate decontamination activities.</p>

Building 123 Proposed Action Memorandum approval	
<p>The Colorado Department of Public Health and Environment (CDPHE) Hazardous Waste Management Division (HZMD) has reviewed the revised Proposed Action Memorandum (PAM) for Building 123 submitted for the Rocky Flats Environmental Technology Site (RFETS/Site) on August 18, 1997. As identified in the PAM, several documents have yet to be developed as part of the decommissioning of 123. The documents to be developed include: the Project Execution Plan (PEP); the Individual Hazardous Substance Site IHSS 148 Sampling and Analysis Plan (SAP); the IHSS 148 Remediation Plan; the RCRA Closure Plan for Unit 40; the asbestos abatement plan; and the demolition plan for 123. As stated in the PAM, the SAP, the remediation plan and the Unit 40 Closure Plan will be submitted to the Division for review and approval prior to initiating work governed by those documents. The Division hereby conditionally approves the Building 123 PAM.</p>

Provides comments to K-H on Final Closeout Report, B123 Decommissioning Project	
<p>(1) RFCA requires a Closeout Report for each accelerated action undertaken at Rocky Flats; (2) The demolition of Building 123, 113, 114, and 123S was an accelerated action authorized and conducted under the Proposed Action Memorandum (PAM) submitted to Colorado Department of Public Health and Environment (CDPHE) and approved by that Agency after public comment on August 25, 1997; (3) The Final Closeout Report was submitted simultaneously to CDPHE and US Department of Energy, Rocky Flats Field Office (DOE/RFFO) on October 7, 1998; (4) OCC provided a review of the document in late October. Their concerns are incorporated into the enclosed comment table. Attached are the comments on the subject report provided by the staff of the Assistant Manager for Environmental Compliance. Please make modifications to address these concerns.</p>

<b>B123-A-000181</b>	6/9/1998
Revised IHSS 121 and 148 SAP approval	
The Colorado Department of Public Health and Environment Hazardous Waste Management Division has reviewed the revised Soil Sampling and Analysis Plan to Characterize Individual Hazardous Substance Sites IHSS 121 and IHSS 148 at Building 123 submitted May 20, 1998. The original SAP was approved by the Division on April 10, 1998. The SAP has been revised as a result of discussions between Kaiser-Hill and the Division. The Division, as lead regulatory agency, hereby approves the attached SAP.

<b>B123-A-000182</b>	5/21/1998
Notifies LRA of minor modification to the Building 123 PAM	
Pursuant to Part 10, Paragraph 126 of the Rocky Flats Cleanup Agreement (RFCA, 1996), this letter serves to notify the Lead Regulatory Agency of a minor modification to the Proposed Action Memorandum for Building 123. The 123 PAM as originally written describes a three phase program: demolition of the building; characterization of the soils in related Individual Hazardous Substance Sites 121 and IHSS 148; and remediation, if necessary, of the souls should any contamination be found in excess of soil action levels. DOE is modifying the work scope to delete the remediation phase from the PAM, deferring this activity to the environmental restoration program.

<b>B123-A-000183</b>	5/27/1998
Forwards the Soil SAP for IHSS 121 and 148 at Building 123	
Forwards the Soil Sampling and Analysis Plan to characterize Individual Hazardous Substance Sites IHSS 121 and 148 at Building 123. Although the Colorado Department of Public Health and Environment has already approved this SAP, it was revised as a result of discussions between Kaiser-Hill Company, L.L.C. (K-H) and CDPHE personnel.

<b>B123-A-000184</b>	4/20/1998
Letter re minor modification to the PAM for Building 123	
This letter advises Colorado Department of Public Health and Environment of a minor modification to the Proposed Action Memorandum for Building 123. Under the approach described in Paragraph 126 of the Rocky Flats Cleanup Agreement, DOE is submitting a minor modification to CDPHE as Lead Regulatory Agency, together with a justification for that modification. The 123 PAM as written describes a three-phase program: demolition of the building; characterization of the soils in relation to Individual Hazardous Substance Sites IHSS 121 and 148; and remediation, if necessary, of the soils should any contamination be found in excess of soil action levels. Portions of the slab would have been removed to gain access to soils for remediation. DOE is modifying the work scope to delete the remediation phase, deferring this activity to the environmental restoration program.

Demolition Plan for Building 123 Demolition Project	
Demolition Plan for Building 123 Demolition Project. This Plan outlines the approach that will be taken and the applicable precautions that will be utilized in the demolition of Building 123. The Plan details the methods to be used, equipment, and sequencing. Utilities isolation and waste handling requirements are also discussed. All demolition activities will be performed in accordance with applicable environmental regulations.

<b>B123-A-000187</b>	5/21/1998
Building 123 PAM minor modification	
This letter serves to notify the Lead Regulatory Agency of a minor modification to the Proposed Action Memorandum for Building 123. The 123 PAM, as originally written, describes a three phase program: demolition of the building; characterization of the soils in related Individual Hazardous Substance Sites IHSS 121 and 148; and remediation, if necessary, of the soils should any contamination be found in excess of soil action levels. The work scope is modified to delete the remediation phase from the PAM, deferring this activity to the environmental restoration program.
