RLCR: 559 Closure Project, January 25, 2002 (Rev 0)	
Reconnaissance Level Characterization Report (RLCR): 559 Closure Project, Buildings 559, 561 and 528; January 25, 2002. The purpose of this report is to communicate and document the results of the RLC effort. RLCs are performed before building decommissioning to define the radiological and chemical conditions of a facility. This report presents the radiological and chemical conditions of B559, 561 and 528, and is built upon physical, chemical and radiological hazards identified in the facility-specific Historical Site Assessment (HSA) Report (September 2001). Environmental media beneath and surrounding the facilities are not within the scope of this RLCR and will be addressed using the Soil Disturbance Permit process and in compliance with the Rocky Flats Cleanup Agreement (RFCA). This Cluster consists of Buildings 528, 559, 559A, 561, 562, 563, 564, the Utility Tunnel between 559 and 561, Tanks 130, 131, 0128, 0129, TK-14, and TK-15. Buildings 528, 559, 561 and the Tunnel are anticipated Type 2 facilities. All the rest are expected to be Type 1.

Backfill of B559 Remediation Areas	
Purpose of Contact: Backfill of Building 559 Remediation Areas. After removal of the process waste line in this area, the hotspot around sample location CD44-005 was excavated in an area approximately 20 by 24 feet and 4 1/2 feet deep. Screening results from the bottom and side of the excavation are very low, well below action levels. Therefore, this area will be backfill at risk, pending final analytical results.
